COURT FF™ 3

The COURT FF™ 3 tennis shoes are designed to help you swing stronger and recover quicker between shots. Novak has a zero-step shot. This means that he's swinging his racket when he lands. By increasing the outsole's contact area, the shoe creates a stable landing and reduces the load placed on the body. As a result, you're able to put more energy into generating a powerful swing. For a smoother crossover step, this shoe allows you to perform quicker turns in a shorter timeframe. With good outsole grip and a TWISTRUSS™ support system, you can push off the ground with more force. This helps you quickly recover and get back to your ready position more smoothly.

FEATURES

FLYTEFOAM® cushioning helps keep the shoe lightweight
 Rear foot and forefoot GEL® technology improves impact absorption and creates a softer feeling at footstrike
 TWISTRUSS™ technology improves quickness and cutting motions
 PGuard® technology helps increase durability in the outsole's toe and heel area
 MONO-SOCK® construction helps improve stability
 AHAR® rubber outsole improves durability
 The sockliner is produced with the solution dyeing process that reduces water usage by a approximately 33% and carbon emissions by a approximately 45% compared to the conventional dyeing technology

GEL-RESOLUTION® 9

The GEL-RESOLUTION® 9 tennis shoe creates advanced stability and cushioning for players who like to control the game from the baseline. SOLUTION SPEED™ FF 2

The fastest model in the ASICS tennis range, our SOLUTION SPEED™ FF 2 Clay shoe is all about helping expand your territory on the court. Combining better stability and a more flexible fit, this shoe is a recommended choice for athletes that are looking for quicker accelerations to be ahead of the ball. The SOLUTION SPEED™ FF 2 Clay model features a PU (polyurethane) application on the upper that helps generate better support, flexibility, and an improved fit. Implementing DYNAPWRAP™ technology into the eyestay, this application helps provide more stability in the forefoot during side-to-side movements. Additionally, the sockliner is produced with a solution dyeing process that reduces water usage and carbon emissions. TWISTRUSS™ technology in the midsole assists players who are regularly moving from the baseline to the net by improving their cutting motions and quick transitions. Providing a faster acceleration period between stops to full-sprints; this shoe is excellent for athletes who want to get to the ball swiftly and have more time to plan their shot with plenty of pace. Recognizing that the first step is usually the most important step during a point, we've designed this shoe to provide better traction in the heel, forefoot and the toe section on clay court surfaces. Combining a responsive cushioning system with a more supportive upper and improved flexibility, the SOLUTION SPEED™ FF 2 Clay shoe is an excellent choice for tennis athletes looking to expand their territory.

FEATURES

DYNAPWRAP™ technology improves stability
 FLYTEFOAM® technology provides lightweight cushioning
 FLYTEFOAM® Propel technology cushioning increases impact absorption and responsiveness
 TWISTRUSS™ technology improves quickness and cutting motions

The TRUSSTIC® technology in the midsole generates better stability on the court. At the same time, the new tooling combines an EVA midsole foam with GEL® technology cushioning in the forefoot to increase shock absorption. Additionally, the improved outsole offers better flexibility and a more durable design.

SKY ELITE™ FF 2

The SKY ELITE™ FF 2 volleyball shoe helps you experience powerful jumps, allowing your game and mind to reach new heights. Specifically created with the attacker in mind, these shoes help reduce energy loss when setting up for the spike. The curved heel design allows you to smoothly cut towards the net by creating an easier forward transition. The midsole's TWISTRUSS™ technology increases jumping force by working with a wider lateral forefoot gauge and the DYNAPWRAP™ lacing system. Together, these technologies improve stability when braking and decrease power loss during jumps. A thicker midsole is layered with FLYTEFOAM® Propel cushioning. This helps you experience more underfoot comfort and higher jumps.

FEATURES

GEL® technology cushioning provides excellent shock absorption
DYNAPWRAP™ technology improves stability during side-to-side movements

FLYTEFOAM® Propel technology cushioning increases impact absorption and responsiveness
TWISTRUSS™ technology helps players transition horizontal power to vertical power without losing energy

Curved heel shape allows athletes to cut-in more smoothly and set themselves up for a more powerful jump.

BLAST FF™ 3

The BLAST FF™ 3 model is designed to provide advanced stability for athletes performing dynamic movements on offense and defense. By revamping the upper's forefoot design, we were able to make this shoe more flexible for multi-directional movements. Our designers also added a MONO-SOCK® construction for a better hold around the ankle. Meanwhile, DYNAPWRAP™ technology in the eye stay features good support for your feet during sudden turns and side-to-side movements. Lastly, the TURNTRUSS™ component in the rear lateral section of the outsole facilitates smoother transitions between each stride.

GEL-ROCKET® 10

A multi-purpose indoor court shoe, the GEL-ROCKET® 10 offering continues to deliver excellent cushioning for a range of court athletes. This season, our updates focus on improving the shoe's stability while offering a more flexible fit. This shoe is designed with a flexible upper construction that can help feet bend more naturally and assist players in moving more freely. Additionally, this shoe also features synthetic leather overlays that improve support in the forefoot and help athletes make confident cuts. Designed with a TRUSSTIC® application in the midsole, this application improves stability during quick transitions. Creating excellent comfort, the GEL® technology cushioning unit in the heel is functional for providing better shock absorption. A wrap-up outsole and outrigger is a functional support component during side-to-side movements. In contrast, the heel wrap-up expands the contact area during the landing phase of your stride to help generate a smoother landing. Lastly, the flexible grooves in the outsole are complemented with a side grip design that improves flexibility on the court.

FEATURES

- Breathable mesh upper
- TRUSSTIC® technology improves stability
- Heel wrap-up generates smoother landings
- Flexgrooves in the outsole improve flexibility

The sockliner is produced with the solution dyeing process that reduces water usage by approximately 33% and carbon emissions by approximately 45% compared to the conventional dyeing technology.

GT-1000™

The 10th anniversary of the GT-1000™ running shoe takes a big step forward in what this model stands for. Designed for the runner with an active lifestyle, the GT-1000™ is a reliable everyday trainer with excellent cushioning. The upper has been reimagined with a new engineered mesh that adjusts to your foot's natural shape while providing a secure midfoot hold. With the addition of an integrated support system, this application improves the heel fit and creates a more secure feel. Following a more streamlined approach, this shoe also uses fewer resources to colour the sockliner. Featuring a layer of GEL® technology cushioning in the heel to improve shock absorption, the GT-1000™ integrates a FLYTEFOAM® midsole material that offers a softer and more supportive feeling at footstrike. Lastly, the DUOMAX® support system consists of a firmer piece of foam on the medial side of the midsole to help reduce the foot's pronounced inward roll (overpronation) while improving stability.

FEATURES

Engineered mesh upper improves breathability
 FLYTEFOAM® technology provides lightweight cushioning
 Rearfoot GEL® technology cushioning provides excellent shock absorption
 DUOMAX® technology helps reduce overpronation
 AHARPLUS™ heel plug improves durability
 ORTHOLITE™ insole provides soft step-in comfort
 Sustainable sockliner dye
