COURT FF™

Power your court game in the COURT FF™ 2 tennis shoe by ASICS that is packed full of technical features to help you twist and jump for each ball. The shoe's FLYTEFOAM® midsole will help put a spring in your run - it's an advanced formulation that responds to the energy of your jumps. There's also GEL® technology in the front and back of the shoe, cushioning your landings so you can reach up for that killer smash with confidence. The SOLYTE® insole also improves your bounce-back, as well as helping the shoe last well. And because comfort is key, we've fitted the COURT FF™ model with a MONO-SOCK™ fit that makes it easy to put on and wear. You want your feet to say fresh and cool, so we've added a removable ORTHOLITE™ sockliner, which helps with bounce and moisture management, while the TRUSSTIC SYSTEM™ technology under the mid-foot makes the shoe nice and stable too. A good tennis shoe needs to be hard-wearing, so there's a tennis AHAR® outsole. This highly resistant rubber compound helps reduce wear on the parts of the shoe which make lots of contact with the ground. With a contemporary design, the COURT FF™ 2 model is a good-looking shoe full of features to help you play great tennis.

FEATURES

- FLYTEFOAM® technology provides lightweight cushioning
- AHAR® rubber outsole improves durability
- MONO-SOCK™ heel collar improves stability
- TRUSSTIC SYSTEM™ technology improves stability
- GEL® technology cushioning provides excellent shock absorption
- Removable ORTHOLITE™ sockliner

SOLUTION SPEED™ FF

The fastest model in the ASICS tennis range, our SOLUTION SPEED™ FF 2 Clay shoe is all about helping expand your territory on the court. Combining better stability and a more flexible fit, this shoe is a recommended choice for athletes that are looking for quicker accelerations to be ahead of the ball. The SOLUTION SPEED™ FF 2 Clay model features a PU (polyurethane) application on the upper that helps generate better support, flexibility, and an improved fit. Implementing DYNAPWRAP™ technology into the eyestay, this application helps provide more stability in the forefoot during side-to-side movements. Additionally, the sockliner is produced with a solution dyeing process that reduces water usage and carbon emissions. TWISTRUSS™ technology in the midsole assists players who are regularly moving from the baseline to the net by improving their cutting motions and quick transitions. Providing a faster acceleration period between stops to full-sprints; this shoe is excellent for athletes who want to get to the ball swiftly and have more time to plan their shot with plenty of pace. Recognizing that the first step is usually the most important step during a point, we've designed this shoe to provide better traction in the heel, forefoot and the toe section on clay court surfaces. Combining a responsive cushioning system with a more supportive upper and improved flexibility, the SOLUTION SPEED™ FF 2 Clay shoe is an excellent choice for tennis athletes looking to expand their territory.

SKY ELITE™ FF 2

The SKY ELITE™ FF 2 volleyball shoe helps you experience powerful jumps, allowing your game and mind to reach new heights. Specifically created with the attacker in mind, these shoes help reduce energy loss when setting up for the spike. The curved heel design allows you to smoothly cut towards the net by creating an easier forward transition. The midsole's TWISTRUSS™ technology increases jumping force by working with a wider lateral forefoot gauge and the DYNAWRAP™ lacing system. Together, these technologies improve stability when braking and decrease power loss during jumps. A thicker midsole is layered with FLYTEFOAM® Propel cushioning. This helps you experience more underfoot comfort and higher jumps.

FEATURES

GEL® technology cushioning provides excellent shock absorption
DYNAWRAP™ technology improves stability during side-to-side movements
FLYTEFOAM® Propel technology cushioning increases impact absorption and responsiveness
TWISTRUSS™ technology helps players transition horizontal power to vertical power without losing energy
Curved heel shape allows athletes to cut-in more smoothly and set themselves up for a more powerful jump.
Wider flexion grooves in the outsole offer better flexibility

GEL-ROCKET® 10

A multi-purpose indoor court shoe, the GEL-ROCKET® 10 offering continues to deliver excellent cushioning for a range of court athletes. This season, our updates focus on improving the shoe's stability while offering a more flexible fit. This shoe is designed with a flexible upper construction that can help feet bend more naturally and assist players in moving more freely. Additionally, this shoe also features synthetic leather overlays that improve support in the forefoot and help athletes make confident cuts. Designed with a TRUSSTIC® application in the midsole, this application improves stability during quick transitions. Creating excellent comfort, the GEL® technology cushioning unit in the heel is functional for providing better shock absorption. A wrap-up outsole and outrigger is a functional support component during side-to-side movements. In contrast, the heel wrap-up expands the contact area during the landing phase of your stride to help generate a smoother landing. Lastly, the flexible grooves in the outsole are complemented with a side grip design that improves flexibility on the court.

DAN GABLE EVO™

Whether you're an experienced wrestler or new to the sport, you'll want an excellent grip from the second you step on to the mat right up until the big tap out moment. The DAN GABLE EVO™ wrestling shoe by ASICS helps you strive for better at each tournament. California Lasting technology provides you with steadfast stability as you dodge your opponent's attacks, while the porous mesh insole helps to keep feet cool and dry for appropriate comfort. The DAN GABLE EVO™ wrestling shoe relies on an ORTHOLITE™ sockliner as a base for comfort. The sockliner also provides moisture management abilities which contribute to a responsive rebound when it comes to those moments that you need to make a quick, strategic lunge or duck. Ultimately, this ASICS shoe is a wrestling must-have for non-slip performance regardless of how long you've been involved in the sport. Its attractive design, combined with the newest technologies will help to transform you into a force to be reckoned with on the mat no matter how skilled your opponent may be.

AGGRESSOR® 5

The AGGRESSOR® 5 wrestling shoe is one of the most comfortable styles in the ASICS wrestling range. An ecsaine material on the upper is designed to wrap your foot with a softer feel. The shoe also features supportive reinforcements on the sides to maintain good stability. These panels are also more flexible than the previous version to move more naturally with your foot. Lastly, the outsole provides targeted traction to help increase your grip on the mat.

FEATURES

Ecsaine upper material wraps your foot with a softer feel. Supportive reinforcement panels help increase stability. Outsole improves traction on mat surfaces. Solution dye sockliner helps reduce overall water usage by approx. 33% and carbon emissions by approx. 45%.

GT-1000™ 10

The 10th anniversary of the GT-1000™ running shoe takes a big step forward in what this model stands for. Designed for the runner with an active lifestyle, they're seeking a lightweight everyday trainer with excellent cushioning. The upper has been reimagined with a new engineered mesh that adjusts to your foot's natural shape while providing a comfortable midfoot hold. With the addition of an integrated support system, this application improves the heel fit and creates a more secure feel. Following a more sustainable design approach, this shoe also uses fewer resources to colour the sockliner. Featuring a layer of GEL® technology cushioning in the heel to improve shock absorption, the shoe also integrates a FLYTEFOAM® midsole material that offers a softer and more supportive feeling at footstrike. Lastly, the DUOMAX® support system consists of a firmer density of foam placed on the medial side of the midsole to help reduce the foot's pronounced inward roll (overpronation) while improving stability.

FEATURES

Engineered mesh upper improves breathability
FLYTEFOAM® technology provides lightweight cushioning
Rearfoot GEL® technology cushioning provides excellent shock absorption
DUOMAX® technology helps reduce overpronation
AHARPLUS™ heel plug improves durability
ORTHOLITE™ insole provides soft step-in comfort
Sustainable sockliner dye
